## INTERNATIONAL SEARCH REPORT

International application No. PCT/JP02/12708

| Box 1 Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)  |
|--|
| This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:   |
| 1. X Claims Nos.: 8  |
| because they relate to subject matter not required to be searched by this Authority, namely:  Claim 8 pertains to methods for treatment of the human body by therapy and thus relates to a subject matter which this International Searching Authority is not required, under the provisions of Article 17(2)(a)(i) of the PCT and Rule 39.1(iv) of the Regulations under the PCT, to search.  2. Claims Nos:  |
| because they relate to parts of the international application that do not comply with the prescribed requirements to such an<br>extent that no meaningful international search can be carried out, specifically:   |
| ·  |
| *  |
| 3. Claims Nos.:  |
| because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).  |
| Box II Observations where unity of invention is tacking (Continuation of item 3 of first sheet)  |
| This International Searching Authority found multiple Inventions in this International application, as follows:  It is recognized that the matter common to the inventions as set forth in claims 1 to 7 of the present application and the inventions as set forth in claims 9 to 14 resides in "an antibody binding to PepT". However, such an antibody had been publicly known as reported in the following document. Thus, this constitution cannot be regarded as a novel matter. Therefore, it cannot be considered as the major part of the invention.  Also, it cannot be recognized that these groups of inventions have a common technical problem which had remained unsolved until the application. Such being the case, the inventions as set forth in claims 9 to 14 and the inventions as set forth in claims 1 to 7 (continued to extra sheet)    As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. |
| <ol> <li>X As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.</li> </ol>   |
| <ol> <li>As only some of the required additional search fees were timely paid by the applicant, this international search report covers<br/>only those claims for which fees were paid, specifically claims Nos.:</li> </ol>   |
|  |
| <ol> <li>No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:</li> </ol>   |
| Remark on Protest The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.   |
|  |

International application No. PCT/JP02/12708

Continuation of Box No.II of continuation of first sheet(1)

of the present case are not considered as relating to a group of inventions so linked as to form a single general inventive concept.
